				5)			(20,103/23,83 3)	3)	(22,036/26,40 0)		(22,036/26,400)		undergraduate students enrolled in CHEL identified and RDC-identified priority programs can be attributed to several factors. 1.A number of students who did not meet the prescribed retention standar in priority programs were transferred to of non-priority programs within the university. While the enforcement of these policies upholds academic quality, it consequently reduced the enrollment figures in priority programs. 2. Some degree programs (i.e. Bachelor of Public Administration) that we previously listed as national or regional priority programs have been reclassified a non-priority due to changes in regional or national workforce demands. This realignment affected the computation of the overall percentage of students under prior programs. Action Plans to Attain the Targets 1.Conduct regular consultations with stakeholders and the Industry Adviso Board to ensure that program offerings remain responsive to labor market deman regional development needs, and emerging industry trends. 2.Conduct intensive carecorientation, academic advising, and promotional activities that highlight the relevance, employability, and opportunitie offered by national and regional priority programs to attract and retain qualified students. 3.Strengthen academic support and intervention programs to help student meet retention requirements and remain in irriority programs. 4.Regularly review and align the list of institutional programs with
